When you need to create an interesting and engaging presentation for your head, new customers or a job interview, you have a lot of options for tools to get the job. Also, even if it is the industry standard, you don't need your Microsoft PowerPoint and many people claim that there are only better tools for work anyway. This week we will see five of the best of those alternative presentation tools, based on your nominations. At the beginning of the week, we asked you what favorite applications use to make slideshows and presentation tools, based on your favorite was better than PowerPoint anyway. We cannot highlight all the candidates, but here are the first five. Create dazzling presentations for customers, work meetings or even work interviews is no morethe survey is closed and the votes are counted. To see which alternative PowerPoint you think it's the best, go to our weekly alveario five follow-up posts to check the winner! Create a presentation or an interesting, informative and elegant presentation for a business meeting, for a company meeting (Mac: \$ 19.99) Keynote of Apple and is probably one of the most intuitive presentation applications, easy to use and heavy-heavy I've ever used. Many of you thought the same, and stressed that it is very easy to create good-looking presentations with Keynote without going out time by digging through the menus or looking for models that were not used to death from all the others. Keynote has excellent built-in graphic tools to edit and edit images entering presentations, easily support videos and movies on slides or as part of your presentation, it has no hokey animations, supports PowerPoint documents if you need spices of someone else's presentation via the video out and watch your notes and the next slides on your Mac.Google Docs display (Web: free) Google Docs presentation form for Be quite ruthless, but they recently updated it to make it more compatible with the people who come from Microsoft Office, or people who want a more robust presentation tool. and slide transitions to make your presentation interesting to watch, and also the collaborative presentation that modifies with other people in your slides (even if you can incorporate YouTube or other web videos), if you don't need bells and whistles of an application of a more constant application and just want a quick way and free to create good by looking at presentations on any system, this is it google Docs rolled a new version of its presentation tool with over 50 new features, $\tilde{A} \notin \hat{a}, \neg \mid \tilde{A} \notin \hat{A} \iff \hat{A} \notin \hat{A} \iff \hat{A} \notin \hat{A} \iff \hat{$ apply it for your graduate thesis, you will adore the Beamer. Where other presentation tools offer you a GUI in which you drag yourself into elements you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and then tweak text boxes to include the information you want to use as images and videos and the information you want to use as images and videos and the information you want to use as images and videos and the information you want to use as images and videos and the information you want to use as images and videos and the information you want to use as images and videos and the information you want to use as images and videos and the information you want to use as images and videos and the information you want to use as images and videos and the information you want to use as images and videos ar works virtually any latex document. Self looking fast and easy to use, this is not true, but if you have already familiar with the latex and you used it in the past (it is extremely popular in academia and technical people who would prefer to write their presentations and the modification of each Possible feature rather than giving control to a GUI), then it offers a granular level of control according to which other tools do not provide. Price (Web / Win / Mac / Linux / iOS: Free, \$ 59 / year "Have fun," \$ 159 / YR PRO) Prezi takes presentations and transitions available in other pale presentation applications compared to the premiere unit "Zooming of the user interface", which moves entire slides and focuses strongly on images, graphics and movement to attract attention. On the text. To some it is all too overwhelming and distracting from the main message of the presentation, and some have called the showed unprofessional presentation. models, but many others noted that the tools of prezi make it easy to create presentations that are really interesting and a world Apart from the opaque slideshow we are all used to. You can create an account for free and start creating presentations on the web, up to a storage limit from 100 MB. If you need more space, \$59 / year takes you a "Prezi Enjoy" account, 500 MB and the ability to make your presentations private and remove the Pressure watermark. \$ 159 / year will take you a PRO account, which accompanies you up to 2 GB of storage and access to the Prezi desktop, an Adobe AIR app that allows you to work on your presentations outside of a browser. Green Office of the Prezi desktop, and access to the Prezi desktop, and access to the Prezi desktop, and access to the Prezi desktop. Impression (Windows / Mac / Linux: free) without being too deep in the division between LibreOffice and OpenOffice.org, Impress is the presentation manufacturer for both the productivity suites. When LibreOffice scishes like a fork of OpenOffice.org, it has made us impress, and now both platforms essentially use the same tool for presentations and presentations. Both version support PowerPoint presentations and offer a user-friendly drag-and-drop user interface to build new presentations that you have familiar with if you have used one of the tools here, but extends its DRAEWING and graphic functionality a little. Now that you've seen the first five, it's time to put them all to a vote and decide the winner. Mentions Mentions Mentions Mentions Mentions Mentions Mentions this week go to Sliderocket, which has entered with only a few timid nominations to create the top five, and the previously mentioned bunch.js. Date, the creation of presentations requires using an app as PowerPoint and can cause an app. How to various PowerPoint ... Read your favorite does not receive enough nominations to create the top five? Have something to say about one of the contenders we've lost? Remember, Hive Five contenders are based on your nominations in the call for the contenders thread from previous week. Let's listen to it in comments below. Remixed image from Losevsky Pavel (Shutterstock). Click to view the PDF file format is one of the best ways to publish, save and exchange well formatted documents that will seem exactly the same regardless of the device or computer they will open them. Whether it's your R © Sum «, a fiscal form, an ebook, a user guide or a web page, you can't go wrong using a PDF. It is likely that you will already have a free PDF player installed on your computer, but you can do much more with your PDF files than you think. Hit the leap for our first 10 lists of techniques for conversion, exchange, sharing, management and modification of PDF documents. If you have a PDF file you want to convert to a PowerPoint presentation, you can download a program to quickly run the job for you, or you can use one of the many online converters available. Convert a PDF file to PowerPoint using Adobe Acrobat DC Adobe Acrobat DC Adobe Acrobat has a couple of different software options to manage PDF files to choose from Acrobat DC and Acrobat Pro DC. The standard version is only for Windows, while the Pro version works with Windows and Mac. These run for \$ 12.99 and \$ 14.99 a month, respectively, thus unless you're not using one of these, probably It is not worth the money just to convert a PDF file to PowerPoint. However, Adobe Acrobat is the best program on the market for anything deals with PDF files, so we advise you to subscribe to one if you frequently make any type of work with PDF files. Better yet, Acrobat Pro DC has a free trial, so if you With Adobe Acrobat, it costs nothing to try. In this example, we will use Adobe Acrobat Pro DC. Open the PDF file you like to convert. In the right pane of the window, select à ¢ â,¬ Å "Export pdfà ¢ â,¬. Now, you will find yourself faced with a list of different export options. Choose "Microsoft PowerPointà ¢ â,¬ from the list and select à ¢ â,¬ Å "Save". Open the freshly saved PowerPoint and see the contents of the PDF file (with each slide that represents a page) in the preview pane. Converter 3 end maintains the size of the content quite consistent. We will use this online tool for this example, but the process is not too different between each converter, so feel free to play and find one that you like most. With SmallPDF, everything you need to do is drag the PDF file to the Converter screen or you can use the file researcher. Whatever the method you choose, once the file has been loaded, the conversion will start automatically. Once the conversion is complete, select à ¢ â,¬ å "Download". After the download is finished, open the freshly saved PowerPoint and see the contents of the PDF file (with each slide that represents a page) in the preview pane. Microsoft PowerPoint is a great tool to create presentations and presentations with a professional aspect. However, the home version requires a Microsoft 365 subscription and the free mobile app also blocks some functionality behind the sub. Fortunately, there are a lot of alternatives Free PowerPoint. Where there is a need for an app, Google seems to have covered it. Google slides is its equivalent of PowerPoint and A "Very as the Microsoft app. Very simple to use and offering fully compatible with the alternative, you can access Google slides via your browser and easily create presentation. purposes. The only minor inconvenience is necessary for internet connection to start at least, but the service also works offline with synchronized presentations once returned online. Prezi is a great option for designers who have a vision but are not technically competent in reaching it. Its simple drive and falling interface makes a breeze organize your presentation as you want it. Backup with other prayers that means that you can create videos or more elegant data views than simple graphs is ideal for more visual industries than others. A series of pre-made models makes it all the most attractive. Prayers is not as free as it seems. To get the richness complete with functionality as the editing of advanced images, offline access and narration, you will need to pay a registration fee. Simple to use but highly effective is the sweet point for rapid results, and this is certainly the case of the Zoho show. You may need to be online to use it, but it's worth the valid connection with an intuitive user interface that fits what you need to do. You can easily incorporate video, tweets and images in your presentations with some clean transition effects that make things more interesting. The collaboration tools further soften the agreement with the annotation characteristics which means you can work together as a team and fast. PowToon faces PowerPoint presentations A slightly different angle from many of its competitors. It is mainly ideal for creating complete animations and videos rather than presentations you click and introduce yourself. Which lends itself perfectly to the internet, which is why it is so useful that you can export your presentations in various forms of Media.ã, with a drive and falling model, you can create something within about 20 minutes from your browser. The free version Bundles in Branding Logos so that the viewers always know that you used Powtoon to create them, but it's a small price to pay for a piece of software software otherwise very accessible and simple to use. Rendering Forest thinks about it is more than only PowerPoint alternative. Take everything that could be necessary from creating logos to design promotional videos, music views, landing pages and websites. This is at the top of its wide animations and the entire creation. This might seem intimidating, but the service keeps things simple, so you won't take much time to mock something and develop it. Follow the free version and there are some restrictions such as the brand on your videos, lower quality logos and so on, but it's a solid start for a free service. In particular, if you just need to invent a 3 minute fast video for a presentation, the resort has covered. Was asked to make a presentation and don't know where to start? Visme is perfect for those who are not experts with graphics as it offers a vast model library. The free plan is a bit limited to your options, but there are still some decent choices here. Furthermore, the service provides interesting ways to make statistics and data seem to excite thanks to the graph and support of the widget. It's all done through a simple drive and a simple fall interface that makes it super simple to add videos and incorporate other content. Keep in mind that the storage options are a bit limited and all on the free level will conceal the Visme.ã brand, LibreOffice a free popular alternative to Microsoft. Unlike most others here, you need to install LibreOffice on your PC or Mac which means it is not good for ChromeBooks or moving between different systems. However, in return, an intuitive experience is obtained which makes it easy to create presentations, whether you take them to a class or at a conference later, or simply projecting them on the screen. Keep in mind that you have to search for the models yourself although both out-putting for the less technical user there is out. Download by: Keynote is the direct competitor of Apple to Microsoft PowerPoint and is an excellent alternatively, PC users can use Keynote via the iCloud website and easily work on multiple devices. One of the best features is the possibility of using the Apple pencil on an iPad to create diagrams or illustrations that make it ideal for qualified artists. In addition to that, Apple offers a lot of convenient models for personal and professional projects. Thank you for letting us know! Tell us because! Because!
