## Dr thomas galen hieronymus machine schematic diagram example pdf

(To make it stick more). Apply a good firm pressure down with your hand until it is hard to move. Basic use of the Hieronymus Machine Prepare the machine for operation – With the power off, make sure the well is empty. Never use poisons in the machine! 3. This is what a stick feels like. As such, a human nervous system is considered to be necessary to operate a Hieronymus Machine.[7] Hieronymus subsequently designed solid-state versions of his Analyzers, substituting germanium transistors for crystal prisms and tunable capacitors for the rotating armature. Use the enamel wire (14) to wind on the wood dowel. Restore the machine to step 1 when you are done. 25. ~ Williams, William F. Dr. Hieronymus invented various specialized models of the Hieronymus Machine. ^ Sampson, Wallace; Vaughn, Lewis. There is no ill effect to the original healthy person. A-11. Tie it with thread to keep it together. Use black insulated wire (11) and keep the runs as short as possible. The pendulum will change the direction of rotation at the point where the stick changes. Each Course Level builds on your mastery of the previous level Course Level 1 No stick reaction needed: general treatment on rates, homeopathic, anapathic. 21. His machines have been compared to the quack devices of Albert Abrams and have also been described as an example of pseudoscience.[4][5] Notes ~ Hite, LeLand L. Course Level 2 Stick reaction needed: Diagnosis leading to specific treatments Course Level 3 Thought projection needed: Getting special answers and treatment rates Course Level 4 Controversial procedures: finding missing persons to supernatural communication. The on the machine for 5 minutes The food is ready to eat. It has been noted that as the years have progressed, the readings on the intensity dial are increasing for the same measurement. Hardware or hobby store. Remove the vials from the machine. The negative to the image must not be destroyed or enclosed in a metal or plastic box. No chemical materials needed. Metal pointer attached electrically to shaft. It can be an aerial photograph or a sample. o A photograph of the patient. ^ Hieronymus (1988). Part V. p. Who knows what new purposes may be discovered by individuals with open minds. Although he made vast improvements in vacuum tube amplifiers, he began to experiment in the groundbreaking technology of transistors to create a working Hieronymus Machine. What does this machine claim to do? This means 9 on the left dial, 49 on the right dial. Then you adjust the Tuner knobs, for a better stick reaction, then fine-tune the refractor again to get the final accurate response. There are many other modes of operating the Hieronymus Machine, and most of them are in the Elopctic Medical Directory, Cosmiculture Manual, and research notes from Hieronymus, contained in these CDs. I use PayPal for all payments. (Signal not attenuated for powerful treatment) 5. Practice this time and again. As quoted in a conversation to the authors of The Secret Life of Plants, Peter Tomkins and Christopher Bird, Galen Hieronymus, a patent holder of a radionics device, said: Is the force and its manipulations basically in the realm of the psychic? 12. Counterclockwise is low capacitance, clockwise is high capacitance. o A Neutralized piece of white paper with the patient's signature or writing. Digipkey. 1. I think they do this because they believe that they are using the box, when, in reality, they are using only psychic ability. Move your hand in a circular clockwise motion. Connect a red Output wire to the patient's right hand (not supplied) 4. G. o A witness in a vial to be placed in the well. Disclaimer Hieronymus placed the following disclaimer on his machines: This is an experimental instrument. Here are some different types of witnesses. Two air variable tuning capacitors. Flip the neutralize button down (towards the 'N') for 20 seconds, and then back up. Rid weeds and pests using a Hieronymus reagent. 1. Amplify the positive energy of a healthy person and impart it to ingestible reagents or the patient directly. Later experimenters found that they could set the Stick response by a pendulum, a hand hovering over the pad, etc. Look up a particular treatment rate in the Elopctic Medical Directory. Energize foods with a reagent 1. It performs two major functions: 1. With your left hand on the intensity knob, slightly turn the knob clockwise till the stick in your swirling right fingertips goes away. Assembly Procedures A. Red goes above black when looking at the panel. Place the master reagent vial in the well. No percutting. When not in use the rate knobs should be set for 0-0 or 0100. 14" x 10", bottom half of box depth 2.5", lid depth 1.5" Plain pine wood. Are you getting a stick at zero intensity? Start the winding at the side closest to the mouth of the beaker. The primary function was to determine what element or elements were in an unknown sample of material, and roughly their quantities. Just smooth enough that when the energy come through the stick pad, you fingers are ready to respond to the stickiness that develops. No one had ever thought of such a machine, and mainstream science is perplexed that his patented device does work. Hieronymus probably did not sell any of these machines, but cannibalized many of them for other machines he tried to invent, and some he gave to Universities, etc. Wind 8 turns around the Pyrex beaker (13) with enamel wire (14). He suggests a 5.5 degree incidence from the perpendicular to give a proper spread of 10 to 40 degrees out of the prism, as measured from the face. Start your intensity at a high value (seven rotations = 700). Drill a hole in the control panel and mount the Pyrex (13) into it with epoxy glue (27). North, south, east, or west, all work fine. 24 gauge enameled wire. Obtain a weather rate from the Cosmiculture Manual. etc..... It may irreversibly turn your machine. It is well within the reach of experimenter who can solder, handle hand tools, read schematics, and order parts online. Make sure it is cleaned out. Give yourself a foot of free wire extending out the back of the control panel. The capacitors did not even need specific values, because it did not matter! Otherwise he would have been required to disclose the values in the patent. o Turn off the machine o Remove the object(s) from the well with a clean tissue or tweezers, and set aside on a clean tissue for future use. Superluminal communication, finding lost children, communication through time? Turn on the machine for 5 minutes The food is ready to eat COURSE LEVEL 2 Stick reaction needed: Diagnosis leading to specific treatments. It could be directly connected to the amplifier, or even in close proximity if coils are used. Create an ingestible potion in the procedure above 2. These plans use his transistor version of the amplifier, which makes them simple to produce with currently available parts. A neutralized Q-tip with a very little dried sputum from the patient's inside cheek. ISBN 0-486-20394-8. But the story doesn't end there. Put 3C vial 2 in the well, and 2C vial 1 (now erased) on the stick pad. Obtain a reagent rate that is detrimental to the witness, from the Cosmiculture Manual. In some cases, the stick is so strong that the pad could move if it is not solidly mounted. Although not supplied with my machine, you can purchase a pair of electrodes at an additional cost. Neutralize all tools, test tubes, things that touch the witness, before using them. 1949 Atomic Analyzer is a vacuum tube Hieronymus Machine In 1949, Dr. Hieronymus was awarded a United States patent for his Atomic Analyzer. Q. 9. If it does exist (stick), you can now determine the intensity of the condition. A similar thing is reported in using the pendulum over the stick pad. The intensity should be fully counter-clockwise to Zero. Leave 1" on each end for soldering later. For the general student of the aforementioned psychical studies, an Hieronymus machine of the basic type set forth in the patent can be a common point of departure in psychic studies. A group of hairs cut with clean scissors. Swirl your right finger pads on the stick pad in a 3" oval, about 2 times a second. Turn on the machine for 20 seconds 10. Connect two Output wires to the patient's hands (not supplied) 6. Create a witness on the wood or glass. o As you represent the patient, rub the 100% effect corresponding to the settings you have set. o Turn on the machine for 20 minutes Fertilize, balance, and rid toxins from the soil using a rate 1. Do face any of the water and rise to clean the tubes if the machine can be unbelievably generic, replaced by symbolic representations, or eliminated altogether. Combining multiple reagents into one vial of water. No percussing is necessary. You get a stick at zero intensity, and when you increase the intensity, there will be a point where the stick goes away 27. From tests by Hieronymus and other independent researchers, the machine will work for 80% of the population. It is possible to cause harm to the plant or animal (such as pests) so you need to be very careful that you fully understand the operation of the machine before you use it. Call it vial 1 (2C). Turn on the machine for 20 minutes Vitalize seeds to boost growth 1. Power up the machine. Obtain a reagent that is detrimental to the witness, from the Cosmiculture Manual. Practice at least a dozen times, increasing and decreasing the pressure so you get the feel of a stick reaction. p. Counter-sink the Plexiglas to that the heads are below the surface of the Plexiglas. In either case, the subject could be 1000's of miles away. Place the patient's potion in the well. 60% need lots of practice or instruction, and 20% don't get it at this point, but even years later it may come in. 1/2" x 1/2" by a length so that the control panel will recess into the bottom half of the box. 19. 20. Energy from a vital young person to a remote patient 1. Galen Hieronymus". Analog Science Fiction, January 1977. The detected "eloptic" signals were fed to a three-stage vacuum tube RF amplifier and conducted to a flat touch plate surrounded by a copper wire bifilar coil.[2] By stroking the touch plate an operator could supposedly feel a sensation of "tingling" or "stickiness" when the "eloptic" energy was detected. I have wired it this way to remain historically accurate to all the Hieronymus instruments I have had. Use clean scissors or swabs to gather samples such as leaf ends, hair, fingernail clippings, saliva on a swab (let dry before analyzing). With this rate you will be testing the general vitality (life force) of a subject in the witness. If the plate is cold you will have a harder time to get a stick reaction. About 20% of people get it right away. Place the Plexiglas (25) over the coils, connect the control panel with the nuts and bolts. We will call it the seed vial. More about this later. You can follow the procedure for intensifying this energy vial reagent at this point. Locate missing objects or people. Panel mount plug to mate with 12VDC power jack. Pyrex beaker, cylindrical in shape, no spout desired, 50 or 100 mL. It is his goal to create practical schematics and diagrams, as well as produce a few instruments for fellow researchers into Elopctic energy to help pay for further research. Never place any poison or toxic substance directly in the well. Jensen Hieronymus patented a machine that operates on the real and psychic worlds Dr. Thomas Galen Hieronymus has the unique distinction of having the only US patent of a psychically operating machine. Transmit the effect of Reagents, real medicines, and pills, to a patient 1. It is not necessary to leave the treatment on for more than an hour. Plant the energized seeds. Alternatively, you can wave a magnet over the stick pad to neutralize just the stick pad, Jr. "Correction and Further Data on the Hieronymus Machine". Astounding Science Fiction, August 1956, pp. 112-114. Hieronymus formed a company called "Radiation Laboratory" and made 10 of these Atomic Analyzers. That paper is your personal witness. Turn the intensity dial fully counter-clockwise to zero. o Turn on the machine o Flip the Neutralize button located below the well from its normal up position, to the down "N"utralize position for 20 seconds. Place it in the well. This is the second less common mode. Do not intentionally affect the instrument with your mind, as it is not a psychic generator (Note: modern studies suggest that it can be, and is detailed in Course level 3). Obtain a reagent rate that is beneficial to the soil, from the Cosmiculture Manual. Panel mount LED, any color. Momentary switch with three terminals. 15. (2012 edition, originally published in 1957). Adepts discovered that no machine was needed at all, for them to get the same results. Place the witness and the reagent into the well 4. "The Hieronymus Hoax: Radionics, the Miraculous Pathoclast, and Deception" (PDF). I also compiled information I have extracted from 12 boxes of files and original machines Hieronymus' widow abandoned in a Georgia warehouse after his death. A color or black and white print can. Do the witness use the intensity dial while rubbing the stick plate, there will be the point where the stick reaction will come in. ^ Hieronymus (1976). p. Metal pointer on the stick pad. Spooky Action at a Distance. The Stratist Science of Radionics Popular Mechanics, Oct 1953 Reconstructing the Aether. Building the Hieronymus Machine Medical Analyzer Amplify the vitality of seeds so they grow better. This wiring is also found in the Atomic Analyzer (the machine that was patented in 1949). Are you getting NO stick at zero intensity? This machine is the most widely known. 6. Plug your power supply into the well, and the machine. I propose that any functionally equivalent symbol of a pickup will work as well. If you are unsure, or in a rush, you can assume the more popular mode of stick reaction illustrated in step 9 below, and skip this procedure. Hieronymus also made Transmitters of Elopctic radiation, sometimes called Elopctic Beam Projectors, or Elopctic Radiators. They can be consumed later. When you are ready to practice on a real sample, put it in the well. R. Set the rate dials to 0-0 (or 0-100) which removes any Elopctic energy filtering 11. ^ a b Sladek, John Thomas. Lip should overhang the hole. If the patient is a field of plants, an aerial photographic view is highly recommended. (Signal not attenuated for powerful treatment) 9. Radio Shack. Obtain a sample of the plant or animal to put in the bottom of the test tube. Neutralize vial 1 (2C) so it gets erased and we can intensify again. Turn on the machine for 20 seconds 7. Supposedly, "eloptic" emanations are refracted by the prism at different angles depending on the material. 23.1.8) ~ Operating Instructions and Course ~ By Bill Jensen INTRODUCTION What does this machine do? Thus, the device is an objective incremental teaching tool that can provide a fundamental starting point for the psychic studies in radiesthesia, dowsing, clairvoyance, remoteviewing, inter-dimensional communication, healing, etc. ISBN 1-57958-207-9. If you use the Intensity knob, you can determine the severity of a disease in the plant or animal. 3) Tuner – The machine uses two dials which merely intensify and make more pronounced the stick effect from adjusting of the Refractor. Depress the Neutralize button for 15 seconds to clear out the well of previous influences. With the sample in the well, turn on the machine and do not touch the stick pad. The coil in the well is now acting as a radiator which will repeatedly transmit a beneficial effect corresponding to the settings you have set. o Turn on the machine for 20 minutes Fertilize, balance, and rid toxins from the soil using a rate 1. Use mild soap and water and rinse to clean the tubes if the machine can be unbelievably generic, replaced by symbolic representations, or eliminated altogether. Combining multiple reagents into one vial of water. No percussing is necessary. You get a stick at zero intensity, and when you increase the intensity, there will be a point where the stick goes away 27. From tests by Hieronymus and other independent researchers, the machine will work for 80% of the population. It is possible to cause harm to the plant or animal (such as pests) so you need to be very careful that you fully understand the operation of the machine before you use it. Call it vial 1 (2C). Turn on the machine for 20 minutes Vitalize seeds to boost growth 1. Power up the machine. Obtain a reagent that is detrimental to the witness, from the Cosmiculture Manual. Practice at least a dozen times, increasing and decreasing the pressure so you get the feel of a stick reaction. p. Counter-sink the Plexiglas to that the heads are below the surface of the Plexiglas. In either case, the subject could be 1000's of miles away. Place the patient's potion in the well. 60% need lots of practice or instruction, and 20% don't get it at this point, but even years later it may come in. 1/2" x 1/2" by a length so that the control panel will recess into the bottom half of the box. 19. 20. Energy from a vital young person to a remote patient 1. Galen Hieronymus". Analog Science Fiction, January 1977. The detected "eloptic" signals were fed to a three-stage vacuum tube RF amplifier and conducted to a flat touch plate surrounded by a copper wire bifilar coil.[2] By stroking the touch plate an operator could supposedly feel a sensation of "tingling" or "stickiness" when the "eloptic" energy was detected. You can follow the procedure for intensifying this energy vial reagent at this point. Locate missing objects or people. Panel mount plug to mate with 12VDC power jack. Pyrex beaker, cylindrical in shape, no spout desired, 50 or 100 mL. It is his goal to create practical schematics and diagrams, as well as produce a few instruments for fellow researchers into Elopctic energy to help pay for further research. Never place any poison or toxic substance directly in the well. Jensen Hieronymus patented a machine that operates on the real and psychic worlds Dr. Thomas Galen Hieronymus has the unique distinction of having the only US patent of a psychically operating machine. Transmit the effect of Reagents, real medicines, and pills, to a patient 1. It is not necessary to leave the treatment on for more than an hour. Plant the energized seeds. Alternatively, you can wave a magnet over the stick pad to neutralize just the stick pad, Jr. "Correction and Further Data on the Hieronymus Machine". Astounding Science Fiction, August 1956, pp. 112-114. Hieronymus formed a company called "Radiation Laboratory" and made 10 of these Atomic Analyzers. That paper is your personal witness. Turn the intensity dial fully counter-clockwise to zero. o Turn on the machine o Flip the Neutralize button located below the well from its normal up position, to the down "N"utralize position for 20 seconds. Place it in the well. This is the second less common mode. Do not intentionally affect the instrument with your mind, as it is not a psychic generator (Note: modern studies suggest that it can be, and is detailed in Course level 3). Obtain a reagent rate that is beneficial to the soil, from the Cosmiculture Manual. Panel mount LED, any color. Momentary switch with three terminals. 15. (2012 edition, originally published in 1957). Adepts discovered that no machine was needed at all, for them to get the same results. Place the witness and the reagent into the well 4. "The Hieronymus Hoax: Radionics, the Miraculous Pathoclast, and Deception" (PDF). I also compiled information I have extracted from 12 boxes of files and original machines Hieronymus' widow abandoned in a Georgia warehouse after his death. A color or black and white print can. Do the witness use the intensity dial while rubbing the stick plate, there will be the point where the stick reaction will come in. ^ Hieronymus (1976). p. Metal pointer on the stick pad. Spooky Action at a Distance. The Stratist Science of Radionics Popular Mechanics, Oct 1953 Reconstructing the Aether. Building the Hieronymus Machine Medical Analyzer Amplify the vitality of seeds so they grow better. This wiring is also found in the Atomic Analyzer (the machine that was patented in 1949). Are you getting NO stick at zero intensity? This machine is the most widely known. 6. Plug your power supply into the well, and the machine. I propose that any functionally equivalent symbol of a pickup will work as well. If you are unsure, or in a rush, you can assume the more popular mode of stick reaction illustrated in step 9 below, and skip this procedure. Hieronymus also made Transmitters of Elopctic radiation, sometimes called Elopctic Beam Projectors, or Elopctic Radiators. They can be consumed later. When you are ready to practice on a real sample, put it in the well. R. Set the rate dials to 0-0 (or 0-100) which removes any Elopctic energy filtering 11. ^ a b Sladek, John Thomas. Lip should overhang the hole. If the patient is a field of plants, an aerial photographic view is highly recommended. (Signal not attenuated for powerful treatment) 9. Radio Shack. Obtain a sample of the plant or animal to put in the bottom of the test tube. Neutralize vial 1 (2C) so it gets erased and we can intensify again. Turn on the machine for 20 seconds 7. Supposedly, "eloptic" emanations are refracted by the prism at different angles depending on the material. 23.1.8) ~ Operating Instructions and Course ~ By Bill Jensen INTRODUCTION What does this machine do? Thus, the device is an objective incremental teaching tool that can provide a fundamental starting point for the psychic studies in radiesthesia, dowsing, clairvoyance, remoteviewing, inter-dimensional communication, healing, etc. ISBN 1-57958-207-9. If you use the Intensity knob, you can determine the severity of a disease in the plant or animal. 3) Tuner – The machine uses two dials which merely intensify and make more pronounced the stick effect from adjusting of the Refractor. Depress the Neutralize button for 15 seconds to clear out the well of previous influences. With the sample in the well, turn on the machine and do not touch the stick pad. The coil in the well is now acting as a radiator which will repeatedly transmit a beneficial effect corresponding to the settings you have set. o Turn on the machine for 20 minutes Fertilize, balance, and rid toxins from the soil using a rate 1. Use mild soap and water and rinse to clean the tubes if the machine can be unbelievably generic, replaced by symbolic representations, or eliminated altogether. Combining multiple reagents into one vial of water. No percussing is necessary. You get a stick at zero intensity, and when you increase the intensity, there will be a point where the stick goes away 27. From tests by Hieronymus and other independent researchers, the machine will work for 80% of the population. It is possible to cause harm to the plant or animal (such as pests) so you need to be very careful that you fully understand the operation of the machine before you use it. Call it vial 1 (2C). Turn on the machine for 20 minutes Vitalize seeds to boost growth 1. Power up the machine. Obtain a reagent that is detrimental to the witness, from the Cosmiculture Manual. Practice at least a dozen times, increasing and decreasing the pressure so you get the feel of a stick reaction. p. Counter-sink the Plexiglas to that the heads are below the surface of the Plexiglas. In either case, the subject could be 1000's of miles away. Place the patient's potion in the well. 60% need lots of practice or instruction, and 20% don't get it at this point, but even years later it may come in. 1/2" x 1/2" by a length so that the control panel will recess into the bottom half of the box. 19. 20. Energy from a vital young person to a remote patient 1. Galen Hieronymus". Analog Science Fiction, January 1977. The detected "eloptic" signals were fed to a three-stage vacuum tube RF amplifier and conducted to a flat touch plate surrounded by a copper wire bifilar coil.[2] By stroking the touch plate an operator could supposedly feel a sensation of "tingling" or "stickiness" when the "eloptic" energy was detected. I have wired it this way to remain historically accurate to all the Hieronymus instruments I have had. Use clean scissors or swabs to gather samples such as leaf ends, hair, fingernail clippings, saliva on a swab (let dry before analyzing). With this rate you will be testing the general vitality (life force) of a subject in the witness. If the plate is cold you will have a harder time to get a stick reaction. About 20% of people get it right away. Place the Plexiglas (25) over the coils, connect the control panel with the nuts and bolts. We will call it the seed vial. More about this later. You can follow the procedure for intensifying this energy vial reagent at this point. Locate missing objects or people. Panel mount plug to mate with 12VDC power jack. Pyrex beaker, cylindrical in shape, no spout desired, 50 or 100 mL. It is his goal to create practical schematics and diagrams, as well as produce a few instruments for fellow researchers into Elopctic energy to help pay for further research. Never place any poison or toxic substance directly in the well.
