Maadhaar app download for jio phone.

There is a possibility that a person can misplace or lose his or her Aadhaar Card if it carries everywhere, so for the convenience of citizens of India, mAadhaar is the official application of UIDAI where you can add your Aadhaar Card and carry it every time with you. The mAadhaar can be installed on your android smartphone.A total of three Aadhaar profiles can be created in the app. The process to do the same is as follows:Open the mAadhaar appProvide your password to loginClick on your profile to open itNow select the three dots on the top right corner of the appSelect the “Delete Profile” optionYou will be asked to enter your app’s passwordA message will be displayed asking whether you are sure to delete the profileClick on “Yes”Your profile will be deleted from the mAadhaar appHow to lock your biometric from mAadhaar AppLog in to the mAadhaar app in your phone by putting your password and user idClick on your profile and open itClick on the “Biometric Settings” from the menu on top-right corner of the appChoose the “Enable Biometric Lock” optionYou will see a disclaimer which says that the biometrics may still be used for the next six hoursClick on “OK”An OTP is sent to the registered mobile numberThe OTP is automatically fed by the appYour biometrics will be locked immediatelyHow to unlock your biometric from mAadhaar AppGo to the top-right menu and click on “Biometric Settings”A message is displayed, “Your biometrics will be temporarily unlocked.”Click on “Yes”Your biometrics will be unlocked for 10 minutesIf you want to disable the biometric lock, you can do it by visiting the UIDAI’s website.How to use the TOTP Feature in the mAadhaar AppTOTP means time-based OTP which is valid only for 30 seconds. In case of upgradation or switching of mobile number, you should delete your profile and then uninstall your mAadhaar app as a safety precaution before handling your phone to someone else. You need to follow simple steps to download and install mAadhaar App-Visit Google play store on the Install buttonGive required permissions to the appThe app will be installed on your phoneYou must set a password for your appThis password needs to be entered whenever you login to the appThe password must be of 4 digits and consists all numeralsThe password ensures that even if your phone is in unauthorized hands, your Aadhaar data is not compromised.How to add profile in your mAadhaar AppA profile can only be added in your mAadhaar App When mobile number registered with Aadhaar is the same as being used in the smartphone.Steps to add your profile in mAadhaar:Open the mAadhaar appEnter your password to login to the appNow select the three dots on the upper right corner of the interfaceSelect the “Add profile” optionNow enter your Aadhaar number or simply scan the QR code on your Aadhaar cardNow enter your Aadhaar number or simply scan the QR code on your Aadhaar cardClick on the Next buttonGive relevant permissions to the app to access your SMSAn OTP is sent to the registered mobile numberThe app automatically detects the SMS from UIDAI and enters the OTPThe app will download your Aadhaar details on your smartphoneYou can access it anytime you want to use your AadhaarBoth the front side as well as the back view of the Aadhaar is auto downloaded in the app How to delete your profile in mAadhaar AppOnce you remove the sim of your Aadhar linked mobile number, your profile in mAadhaar automatically gets deleted from your smartphone. Linking of Aadhaar is with the bank accounts, mobile number, PAN, UAN and for availing several subsidies under various government schemes.Therefore, UIDAI came up with a solution for it with the digital partner mAadhaar. Aadhaar is considered as a mandate document to avail of several services as per Government regulation. Here is the step to use the TOTP feature in the mAadhaar App.Log in to your mAadhaar app by entering your passwordSelect your profile and open it.In the lower half of the app, select the option “Show TOTP”.A new screen will appear with a six-digit TOTP. A clock moves continuously for 30 seconds.As soon as 30 seconds gets completed, the OTP is changed instantly.Below the TOTP, you can find your name and Aadhaar number.Advantages of mAadhaar AppThere is no need to carry your original Aadhaar card. To use the TOTP service, the user should have an active internet connection. The app is well protected by the security password that the user must enter to open the app every time. This ensures that the Aadhaar data present in the app can only be accessed by the user himself or herself. Compatibility of mAdhaarAt present, one can install the mAadhaar app only on smartphones working on Android 5.0 and above. This facility is yet to be available on an iOS variant of the mAadhaar.Only that Aadhaar can be downloaded on in the app which is linked with the mobile number used in the phone.If your mobile number is not registered with Aadhaar or you have a mobile number registered in Aadhaar that is different from the one being used in the mobile device, you will not be able to avail the facility of mAdhaar. You can make use of the mAadhaar app for availing Aadhaar-based services.You can easily lock or temporarily unlock your biometrics anytime through this appIn case Aadhaar OTP is not sent to your mobile number due to some issues, with the help of the TOTP facility of the mAadhaar app.mAadhaar allows users to share their Aadhaar details using the QR code, thus preventing the possible leaks of dataA user can share his e-KYC through message or email directly with the agency To know more here how to register your mobile number on the Aadhaar card.How to do mAadhaar App installationmAadhaar App can be installed only on Android Smartphones.
