Highlight Background=#78ffb1a³ Color=#16181Bâ] Note: If the download link doesn't work, check the programming page and download the latest version [/su highlight]. Do you want to access root accounts) Steps to Install Android 11 AOSP ROM on Xiaomi Mi A3 | Android 11 Update () Make sure your device is rooted and the latest TWRP recovery is installed. (Check the first section of the requirements above.) First, download and unzip the files from the link above. Now transfer the downloaded files to your device's internal storage. Now reboot to reset TWRP, make a backup, select option from home screen, then select data and cache from recovery menu. Guide: â Now to create and restore Nandroid backups, go back to TWRP main menu and wipe cache, data and system before flashing the ROMGLINE to delete cache, cache, system, provider and data and then delete. (Select an internal memory) Now go back to the TWRP main menu and install the Rome that is only one .zip file-> Install the ZIP file-> ROM (.zip) after completing the installation process Your phone back and restart it. Your Android 11. You are booted by Rome. If you have doubts about this process, please comment on this below. Update 2 (01.05.2021 at 05:40 ET): Xiaomi started again with the rollout of the update and the users report better this time. Xiaomi has made an announcements about updates and problem expenses. Scroll down to obtain more information. An article published on December 31, 2020 was saved below. Xiaomi has started the rollout of the stable Android 11 update for the MI A3. The update is 1.4 GB in size and, in addition to other improvements, also brings Android 11. XDA member Maciej.maciewicz has already been informed about the Android 11 update for the MI A3, and it should be rolled out for further devices in the coming days . However, the first reports indicate that not everyone may be satisfied with the update, so we recommend that you wait a few more days. Updated, support for chat bubbles, intelligent device control, new media control, disposable pages, automatic Android wireless support, language notifications and more, including all standard Andriod 11 beauties. New in Android 11. See this article. MI A3 Android 11 Update: Improved Shadow Wage Bubbles Better improved Authorization Management Dnd Android 11 Update MI A3 users began to fertilize users; However, it can take some time for the rollout to take place on all devices, e.g. B. at OTA rollouts. If you have not yet received an update notification, you can go to settings> System> System update and click on "Find update" to see if you can download it (we recommend not doing this). According to the first reports of several users, it is difficult to update locked devices to Android 11. Users who accept the update now get stuck in a non -reacting state where their phones no longer react. Since the update is fresh, there is not much information about what exactly is going on, or a solution for stuck users. This one hereThe first time that you have problems with the MI A3 update. At the beginning of this year, a telephone update violated the double functionality. Xiaomi later delivered the error. In this case, we recommend that the users wait a few days because the visible damage seems to have disappeared from the facie on the phone. The Xiaomi MI A3 Forum Xda MI A3 was started outside of Android 9 Pie and finally updated to Android 10 at the beginning of this year. It is likely that the update of Android 11 is the latest devices update. However, this should continue to receive security updates for another year. As an Android One device, the MI A3 offers an almost standard android experience that stands out in the other series of Xiaomi with highly personalized skin -miui. The MI A3 update for Android 11 certainly showed some important problems that the device has died for users. The company quickly discovered the problem and interrupted access before other users click. For interested people, Xiaomi now offers free repairs (/solution), regardless of the guarantee. After the latest update from Android 11, we are aware of this problem on some devices MI A3. Since then we have interrupted the app. We ask users who find this problem and visit one of the more than 2000 auxiliary centers at the national level if the solution is provided unconditionally (or under guarantee). We apologize for the inconvenience. As a brand that is committed to the best user experience, we will continuously improve our products and services. While the transmission is definitely okay and the users should give users a break, the question arises spontaneously if it does not do it first. The series is not absolutely familiar to this type of error and until then we expected the company to offer better quality test processes for serial popup updates with Xiaomi caliber. The Android 11 - update from MI A3 was reintroduced. Users report that this time you have received the usual brush and a brave update to accept the same overview that the device actually starts and works normally. Here are 8 pictures that we will not connect to the download links because we do not fully trust the stability of the update. If you use your device for critical functions, we recommend avoiding updating and waiting for further reports. In both cases now aThis is a good time to back up all important data on your phone, whether you agree to the update or not. Thanks to Telegram user Srejith and @TheseventOneOneGuy for the screenshots. Screenshots.
