(Read 134 times) United Kingdom 242006 messages 15,154 that suck. This was simply the easiest way to extract btc from nicehash and andto some other currency. But I don't know who to blame. nh has not always been a great member of the industry, and they are throwing all the blame on cb. recommendations for alternatives, since nh does not offer their exchange in the United States? Last update: 15 May 2021 joined Mar 4, 2007 messages 8,517 are blaming the base of money entirely. nh hates to be responsible, but this decision that happens during the night without notice is unforgivable. nh could control this simply by limiting instant cashouts to 1x per week on behalf. people are probably cashing every day or several times a day because they are free and are too ignorant to know the stress they put on the infrastructure. reactions: manny calavera, mrgovernment, kirbyjr and other 4 joined to Mar 1, 2014 messages 7,933 are blaming the coin entirely. nh hates to be responsible, but this decision that happens during the night without notice is unforgivable. nh could control this simply by limiting instant cashouts to 1x per week on behalf. people are probably cashing every day or several times a day because they are free and are too ignorant to know the stress they put on the infrastructure. Okay. There are some avenues they could have taken, but the nh is never the villain. posted on May 19, 2008 380 messages, well, I won't hate nicehash after that. I just reached the threshold to withdraw and now the coin I coined is held hostage. Is it time to do something about spam linux? After all, he did a whole sponsored video just for them. reactions: manny calavera, auntjemima and modred189 joined on May 24, 2006 messages 15,154 well, I will not hate nicehash after this. I just reached the threshold to withdraw and now the coin I coined is held hostage. Is it time to do something about spam linux? After all, he did a whole sponsored video just for them. I won't lie.What made me come in. I've been thinking about mining for a while, but I didn't want you to have Ashsel. NH made it easy. But only one bouncing night bouncingeasier way to move my BTC around? Fuck you. Registered on January 18, 2009 Messages 8,758 Yes, it was easy. Honestly I left my BTC on NH in any way, with the new tax rules that I don't want to deposit anything in money... I have a few trades without KYC that I will use or, perhaps, make a VPN in NH and use their platform. Reactions: Mav451, N4CR and Auntjemima Registered on 26 February 2005 Messages 2,044 Use TradeOgre or your wallet to retire and then send your funds to Coinbase to cash in? Anyway, this is another example of "not your keys, not your coins." Nicehash has a convenient "problems" story so I wouldn't use them if it wasn't that you're brand new. Reports: auntjemima 14 April 2010 Messages 6,247 I like paper wallets, don't depend on a hardware wallet network to work. I have a Nano S, which has some coins on it, but not much. Banks are also a means to protect and protect your wealth and not put your family in danger from criminals. Most robbers would probably prefer to steal a single vice person a real bank, some fingers bent or more and most would be dealing on their secret keysiif you are going to be your bank and have a substantial amount, make sure that no one knows, everyone thinks that your poor dirt and about becoming a beggar or put your wallets in a safe box out of sight / contact and still don't tell anyonewealth. How who's gonna tell everyone they have 100 gold oz hidden at home? It's like cutting your throat, that kind of information usually ends up in the wrong hands. Nano I see very useful if you put the funds in it to go somewhere to use by stuff, trade etc. Small amounts for short periods of time, but this is just my opinion. Reactions: Manny Calavera United Kingdom 16 Aug 2004 Messages 11,550 You can't take the wallet of your coin base and transfer your funds from Nicehash to your wallet address. I can't find the confusion for a minute longer work unless I miss something obvious. I just pulled \$500 from Nicehash, and I literally took a minute longer. Edit: oh le tax derp me Reactions: kirbyjr, sgrinavi and noko 14 April 2010 Messages 6,247 I'm really new to the NH and the crypt two weeks ago. He was able to transfer \$25 to Coinbase before this happened. I'm reading the angry r/NiceHash Reddit messages and not getting many ideas from it. So, any suggestions for a n00b crypt like me? Reactions: auntjemima 12 Jun 2018 Messages 763 I'm really new to the NH and the two-week cryptHe was able to transfer \$25 to Coinbase before this happened. I'm reading the angry r/NiceHash Reddit messages and not getting many ideas from it. Then any suggestion forcrypto n00b like me? Reactions: auntjemima 14 April 2010 Messages 6,247 I'm really new to the NH and the crypt two weeks ago. He was able to transfer \$25 to Coinbase before this happened. I'm reading the angry r/NiceHash Reddit messages and not getting many ideas from it. So, any suggestions for a n00b crypt like me? Transfer your wallet when you can, then transfer it to Coinbase. The difference is Nicehash to Coinbase was free and in this other way you will have to pay the transfer fees. However for Coinbase to sell BTC to people, they needed a supply of BTC, once people stop buying BTC in general there is no need. However the free part between Nicehash and BTC was like I don't believe in generosity but for profit. Is there a CB alternative for NH transfers? Free and can exchange between coins easily? I'm running. Running away.on my 2060 when I'm not playing on it, and sinking \$60+ into a hardware wallet, or paying taxes is a huge overhead, proportionally. Posted on 19 October 2004 Messages 11,247 Is there a CB alternative for NH transfers? Free and can exchange between coins easily? I'm managing NH on my 2060 when I'm not playing on it, and sinking \$60+ into a hardware wallet, or paying taxes is a huge overhead, proportionally. He could leave it on Nicehash if it's small potatoes. MFA skill. They have a high confidence score once \$60 for a hardware portfolio is no longer about moving to a hardware wallet. It won't take long. I would suggest you buy your hardware wallet now and learn the ropes. \$60 should not break, or take any food out of the table. DO NOT BUY hardware wallets used or from third party sources as general rule of thumb. You don't know what the seller did before they sold it. If you do, make sure you read the manual for that device, update the latest firmware and restore it completely before using it. Not only take control of a wallet that someone else has set. If they set it up and know the keys, they can claim it at any time. Noko Do you think that some folded fingers would have convinced someone to turn the hardware wallet password, but would not have convinced someone to change the access information of their equivalent bank website? Crypto is not insured FDIC, so while you would be protected if your USD is stolen from any regulated bank in the United States up to \$250,000 — the same may not be true for the particular Crypto Bank you choose. And most crypto storage sites are not regulated, so you do not know which security and compliance standards they are actually keeping. I trust Ledger orlor most Crypto banks — Coinbase is the possible exception. (I am the only crypto bank that is secured FDIC for USD, as well as privately secured for Crypto). Your advice not to share crypto balance - if you hold or is not solid — certainlythat balance grows to something worth protecting. Last modified: 17 May 2021 Reactions: Manny Calavera Member on 12 July 2007 Messages 18,737 So what can I use now to get my money from Nicehash easily? Coinbase was nice, I would get the BTC over there and then throw it as USD in my paypal balance and spend it. I don't even retire until I have .003+ BTC waiting, for idiotic miners, how does a hardware wallet work? Is there something as easy as beautiful to configure that works in all types of GPU and CPU? Nicehash is just an idiotic test to frame and get mining on all my podg settings. Last update: May 17, 2021 Joined Mar 1, 2014 Messages 7,933 I don't spend a penny of myself. HODL BTC will be north of 100K before it hits zero. I feel safe. I got the straight. He had a better return, but this past week was something else lol Reactions: Modred189 e sgrinavi Uniti il 19 October 2004 Messaggi 11.247 A lot of questions that have been asked here are a 30 second Google search away. There are a million videos on YouTube on how to use a Ledger. Ledger has excellent documentation. I really like my Ledger Nano S. I chose Ledger for Trezor at the time based on my research about 3 years ago. I haven't compared them recently or their new models, but my Ledger experience was excellent. My cousin bought a Trezor, and he liked his unit. Reports: Andrew Carr and MrGovernment registered August 3, 2004 Messages 20,035 Kraken is a United States website could use it. many other exchanges you can probably go on. Kucoins is another. Reactions: Zedicus United on 3 August 2004 Messages 20,035 A lot of questions that have been asked here are a 30 second Google search away. There are a million videos on YouTube on how to use a Ledger. Ledgerexcellent documentation. I really like my Ledger Nano S. I chose Ledger for Trezor at the time based on my research about 3 years ago. I haven't compared them recently ornew models, but my main experience was excellent. My cousin bought a Trezor, and he liked his unit. S model is fine if you do not expect to hold more than 2-3 coins on it, otherwise you run from memory and cant add more. Posted on 19 October 2004 Messages 11,247 S model is fine if you do not expect to hold more than 2-3 coins on it, otherwise you run from memory and cant add more. It holds as many coins addresses as you like, but I can only keep the app installation for some at a time. This was a security choice at the time. There's no room for a nefarious code. You do not lose firm or acces when you pass the installed applications, and you can install it at will and quickly. They are very small applications, but it is not possible to move the coin without having the particular application of the coin installed. Over time, it supports multiple concurrent applications that it initially did. Now I can install half a dozen coins applications. But yes, if it is one thing to consider buying X instead of S. He didn't prove me a hindrance. Reactions: MrGovernment United Kingdom on 12 July 2007 Messages 18,737 So what I don't understand is that they had a way to quickly transfer to base currency and free of charge, but you can also transfer to base currency a slow way and get charged a fee. Why was there a difference? Did they have a deal to do it freely and that fire or something? Join 24 May 2006 Messages 15,154 A lot of questions that have been asked here are a 30 second Google search away. There are a million videos on YouTube on how to use a Ledger. Yes, but for those of us who are relatively new, sorting legitimate products and services from shit is not easy. Ask here, and there's the basic amount of knowledge and competence, and at least one filtering of the scams. I don't know about you, but I don't trust google for money decisions. reactions: mav451, jmclcher and frgmstr joined oct 19, 2004. messages 11,247 here are the coin supports ledger ledgerHere are the trezor supports these companies are generally considered as a crypto hardware wallet tier. both of us are only \$60. both support a pretty ridiculous amount of applications/tokens. If you lose or break your hardware wallet, as long as you know the mnemonic word seed key, you can recover your crypt through different means, even without buying the hardware again. Seed words are critical - to be kept offline and protected as much as possible. defeat those words of seed that anyone can hijack your crypt. ledger has really expanded their offers on my nano s in the last 3 years. It is quite amazing how many features they have added. you can buy or sell crypto directly through your device, crypto loan directly through your device, you can monitor your budgets historically, see all historical transactions, and see all token balances regardless of which specific apps you have installed in the live ledger app after synchronization once. you can also set it up to have an alternate account with full functionality so that if someone was trying to fold your fingers as noko put it, you could only open the account page alt to them, and give them what you have there, and keep your main account balance completely out of view. There's no way they know you have two accounts, you would only access the account you provide the correct passphrase. last modification: 17 May 2021 reactions: mrgovernment, modred189 and legcramp joined apr 14, 2010 messages 6,247 could leave it on nicehash if it is small potatoes. skill mfa. have a high confidence score once \$60 for a hardware portfolio is no longer about moving to a hardware wallet. Your advice not to share crypto balance - if you hold or is not solid — certainly as this balance grows to something that is worth protecting. Of course in both cases, but for the criminal one it is a single step while others are dealing with well-protected institutions, monitored the more can pull back illegal funds in a rather long time, more where ever the criminal sent those funds will be known. Being your bank so called can bring other things to the door besides a feeling of freedom. It's just a personal choice, in any case not to share with anyone, except with people you trust totally not to spit out your banking wealth. Also do not fall for scam to use metal plates for your secret key andin your yard, so that the scammer with a metal detector recovers it in a few minutes while you sleep, work and never know until years later when you try to recover it. This method also makes a few use if not a different vice wallet or hundreds of wallets where you can maintain different positionsAn option is to use a standard USD stick bit encrypted, stick one as in your car, other safe, give one to a friend to keep for you (will not be able to access it). Hardware wallets depend on the manufacturer to maintain secure servers, upgrades to coin wallets etc. Hardware wallet trusts a third party to protect keys. If Ledger, Trezor or Keepley has gone out of business, those secure secret keys cannot leave the device, not viewable or retrievable as I can say => loosens your Crypto access. I think they are useful for short-term periods and are very safe. Edit: I was not correct. Archaea shows that you can expel the Crypto Private key if you have your hard wallet seed, see here: Last modification: 17 May 2021 Reactions: legcramp Apr 14, 2010 Messages 6,247 Am I the only one who doesn't spend any of the crypts they're pulling out? From I am a hobby miner, I collected a number of coins more if prudent to sell as necessary to cover the costs. Reactions: Modred189 United Kingdom on 22 June 2009 Messages 2,112 So what I don't understand is that they had a way to quickly transfer to base currency and free of charge, but you can also transfer to base currency a slow way and get charged a fee. Why was there a difference? Did they have a deal to do it freely and that fire or something? Nicehash limits their API and cannot process huge amounts of requests from our service. Although we tried to solve these problems with Coinbase for several months now we couldn't get an answer from them. We know that this is a very popular method of withdrawing Bitcoin to Coinbase and we would like to keep it -how free and almost instant But unfortunately, Coinbase remains unexplosive. As for transfer directly to your currency base address yes there are fees, but its not that bad as .1% so \$2.50 \$2.50transfer out \$2500 value for example, probably a little more if you are trying to transfer a small amount and I think you need to transfer at least .001? Although it is is not "unsteady" I'm pretty sure it's still fast enough. I send transfers to my private wallet from nicehash and its as less than 10 minutes so unless the coin base is slow to report that I take a similar timeframe. Reactions: noko United 19 Oct 2004 Messages 11.247 If Ledger, Trezor or Keepley went out of business, those secure secret keys cannot leave the device, not visible or retrievable as far as I can say => dissolves your Crypto access. No. The hardware wallet stores / secures the private key. If you know your private key you can access your cryptographer from one of the different compatible open source software portfolios. You can restore hardware wallets for software portfolios as necessary (Ledger or Trezor says it comes out of business and you can't replace hardware). The idea of a hardware portfolio is that you can use one of these devices on a fully compromised PC/infected virus, and still maintain secure encryption, because these hardware devices require interaction with the hardware on the device itself to login, send, or transact. Your crypto is protected unless the attacker learns your unique seed keys (an absolute problem, no matter what kind of storage you use), or has the physical device to interact with the software (the interaction of the physical device is the leg on a software portfolio (also you never want to use a software portfolio on a compromised phone or PC) -- not to mention the other sympathies in the hardware portfolio software I listed above and ease of use) Hardware devices dry if an incorrect passwordused too many times (3x on the Ledger for example). How to restore a software portfolio if your hardware dies and cannot be replaced. LedgerTrezor Last modified: 17 May 2021 Reactions: MrGovernment Joined 12 December 2008 Messages 3,513 Am I the only one who doesn't spend any of the crypts they're pulling out? Me too. I deposited \$10 in my PayPal just to make sure this crypt thing is real. The rest will be held. Reactions: Modred189 and Auntjemima Joined April 14, 2010 Messages 6,247 No. The hardware wallet stores / secures the private key. How to restore a software portfolio if your hardware dies and cannot be replaced. Ledger Trezor This is just the/ Seam for Wallet Hardware and not your Crypto Private Keys. Show me where to extract the secret crypt key from Leger or Trezor your real private BTCOr any of the other coins. Run their software/apps, connect their hardware portfolio design, go through their servers and make a transaction. If their service is interrupted or lost for any reason, the keys are locked behind a useless device. You can't just say, hey, what's my private key, write it and then get access to your account/ Wallet using another method. To add insult to lesions, now you have a seed that exposes all your different Cryptos stored on the vice hardware wallet with different private keys separated by many different means. However you show me how to extract the real private key from the hardware portfolio, to have access to your Crypto like BTC, maybe I missed something. Edit: I was not correct, Archaea shows that you can expel the Crypto Private key if you have your hard wallet seed, see here: Last update: May 17, 2021 United Kingdom Oct 19, 2004 Messages 11,247 noko. I have already connected how to do it for both devices (recovery portfolio software) — Without replacing it with as hardware. (Hardware portfolio) — Without replacing it with as hardware. (Hardware portfolio) — Without replacing it with as hardware. (Hardware portfolio) The related instructions contradict what is stated. The missing point, that the recovery/seed phase is not your Crypto Private keys, tells your hardware wallet what keys to use from that seed for different private address coins. No one knows the real private address and is not reviving, you must rely on replacing the original wallet if lost, stolen or damaged. Show how to recover the Secret (Private) key frombtc hardware where I can use that private key in another portfolio like a web wallet, qt wallet etc not depending on their business, network and software. edit: I was wrong, archaea archaeathat you can expel the Crypto Private key if you have your hard wallet seed, see here: Last modified: 17 May 2021 2021
