A complete information about the QuickShortcutMaker APK file you are downloading is provided before you download. The first thing you have to read is the antivirus report, given by more than 50 trusted and recognized antivirus, followed is to verify if the apk developer is the one you are looking for, in many cases the apps or games may have the same name but not be the correct developer. You can also find latest Quick Shortcut Maker Apk versions available and system requirement needed to install it, and more technical information about the Apk file, you can download the apk installer for free, without packed, wrapped or any modification, apk file contain the signature of the official developers. You could also download Quick Shortcut Maker from another alternative website or from the official Android app stores like Google Play Store or Amazon Appstore, but maybe some apps or games could be not available there. This app can create a shortcut to an application from the list of activities which are installed on your phone. Even if so many applications are installed, you can choose an activity smoothly. You can also use the QuickShortcutMaker for searching the app which you want to launch. If you want to use the app which you don't use frequently, maybe you have no shortcuts for it. So, you may have to search the app from a list of many apps. Even if you know the name of the app, it's hard to find it. In this situation, the QuickShortcutMaker will help you finding the app. Please try! This may be useful. But please use it at your own risk! You can make shortcuts to hidden setting screens which are usually not accessible. Even if you encountered any problems using this app or shortcuts created by this app, I don't have any responsibility about that. Please be sure to use this app at your own risk. About Internet access permission: From the version 2.0.1, for a more rapid improvement of the app, you will be requested an additional permission to access network so that the app can send a detailed error report to developer. The app uses network only to send error reports. And when it communicates, a confirmation message will be displayed, so please rest assured. for Launcher3 of Cyanogenmod If you cannot create shortcut, please try the following steps: 1. Long-tap the home screen. 2. Tap "WIDGETS". 3. Long-tap "Activities" which has the QuickShortcutMaker's icon. 4. Drag it to somewhere on the screen. 5. QuickShortcutMaker will be launched. 6. Select an activity, edit it, and tap "Create". 7. A shortcut will be created on the home screen. Follow the updates Google+ plus.google.com/u/0/114542232871046503427 Twitter twitter.com/sika app Recent updates: (v2.4.0) - Added Italian and Arabic translations. - Adapted to AndroidPhone7 theme. - Changed dialog UI. - Fixed a bug that the shortcut for Google Play cannot be opened. - Added function to ask you to rate this app. (Forgive me if you don't like such a thing.)
