If you have, repeat it. Parents also say it will be sent to the old iron if the player does nothing with him and that he can keep it after mounting it and ensuring that he passes in the inspection . The idea of a variant of satsuma GT was first suggested in the update of August 18, 2018, which introduces a GT grid that can be installed on satsuma. The current name of the car model is amp (a badge can be seen next to the right back flashlight), based on a nickname that the car has in Finland, à € œSata AmpEriä €, which translates à € œCem ampas € and written as 100A. A yellow 100A datsun with leopard covers is also highlighted in Vuonna 85 (à € " 85 ') movie. It is a paradigm of the slogan à € œLada Lada Laatuää € (à € œStrong Lada Qualityä €) used by the former Finnish importer of Lada Konela. The car does not have an anti-lock braking system (ABS), so a heavy braking without using the clutch will cause the front wheels they catch, potentially stopping the engine or leading you to drive in a ditch, damaging the front of your car. Along with bigger rear lights, this tells us that the car is a 1973 or 1974 model. The idea for the car probably originated from the comal film and Drama Finlands Pohjanmaa, since, like Satsuma, Datsun From the film do not have gasoline tank port and have the same license plate that received in the game after inspection: VBX-403. The unique exceptions are the battery, the radiator and the oil filter. Extra meters are required only to check the oil pressure and battery charge. This article is about the player's satsuma. The ignition sound effect was probably taken from a video on youtube called 1979 Datsun 120A F11 Cold Start-Up Coupe, as the 0: 07-0: 11 audio reveals an exact

correspondence for the file of Sound playing in the game.
