Size: 47 MB â € . Most web tutorials recommend the BlueStacks app and I might be tempted to recommend it because it is more likely that you can easily find online solutions if you have problems using the BlueStacks application on your computer. You can download the BlueStacks PC or Mac software here >>. Step 2: Install the IL On your PC or Mac you have now downloaded the emulator to your choice, go to the Downloads folder on your computer to locate the Emulator or BlueStacks application. Once you find, click to install the application or EXE on your PC or Mac computer. Now click Next to accept the license agreement. Follow the directives on the screen to properly install the application. If you do exactly, the Emulator app will be installed correctly. Step 3: For PC - Windows 7/8 / 8.1 / 10 now, open the Emulator application you installed and searches for your search bar. Once found, type Luxor in the search bar and press the search. Click on the Luxuraplication icon. A Luxor window on the game store or the App Store will open and display the store in the emulator application. Now, press the Install button and like an iPhone or Android device, the application will start downloading. Now we are all facts. You will see an icon called "All apps". Click on it and will take you to a page containing all installed applications. You should see the icon. Click on it and start using the application. Step 4: For Mac OS Hi. Mac user! The steps to use Luxor for Mac are exactly like those for Windows OS above. All you need to do is install the NOx or BlueStack application emulator on your Macintosh. I enjoy so much with the iPhone version and pays me happily to get a free version. Music, sound effects and graphics blend well in an ancient Egyptian theme. The game has And dozens of levels, and there are no huge jumps in difficulty from a level to the next. (Well, until the final large leader level!) You can also choose easy, normal or difficult mode depending on your level ability (and frustration). They include different different control schemes, so you will probably be able to find one that works for you. This game is so hard it is one of the most difficult games I played in the AppStore. It's not a game for everyone. The version I have, if played on the difficult mode, is so difficult that I thought it was unbeatable. But I'm proud to say that after a year don't give up, I, on this day, finally beat the game. And among other things, I'm never updating for the new version, that the creators of the specified game that made the mode difficult a little easier. This is not intelligent. Because someone should lower the bar of a game, which you can beat, for a bunch of cleaning customers who don't know how to appreciate good stuff? Luxor is an incredible game. The concept of Luxor is one of the best and more unique ideas I've ever seen in a video game. It's a very simple game that anyone can play but don't grow old. You will always want to play only one game more to see how much you can get. Luxor is different from many other simple, easy to learn games on the iPhone because Luxor's tour is not short, which is a very good thing. You can spend many hours trying to beat a high score. The only problem with Luxor is that there is no way to save your high score. He had his day was a fun game. But the developer has practically abandoned all their other applications. No real updates for nothing in two years, not even a price variation for over a year. On all their applications. It is to abandon-ware now. It is worth the .99, but don't waste time with the $ 5 applications they provide, you will not see a new update. still.
