## Granny chapter 2 unblocked games

Game title: Granny Chapter Two Horror games with monster are all different. Some of them put you on the space station, where you have to kill the aliens that attack you. The others depict some post-apocalyptic stories where you find yourself on the planet flooded by someone like zombies or other hellish creatures that kill people with no mercy, eating their brains. In most the horror games like that, you have guns and bullets, so the monsters are not a problem for you (at least, until there are too many of them). You can shoot their heads off, see their limbs flying here and there, and finally find your way to the victory showing that a human being has overcome the filth once again. Even using a gun. However, there are games that doesn't leave you a chance to resist the horror. One of them is Granny. Here you will have to feel yourself frightened and deadly scared all the time. The problem is that Granny will follow you and yes, she will kill you the moment you appear in front of her eyes. However, the worst thing is that you cannot kill her. The first part of the game is similar to the second we have to present. You are going to stay one on one with Granny with no opportunity to deal with her anyhow. You can hide and run, but you cannot fight. Do your best to get away before she kills you. This is your only chance. View source Comments Share Official Steam header. Microsoft WindowsAndroidiOS Is that not what you're looking for? Look at Granny (disambiguation) Granny is an indie horror video game developed by DVloper as a spiritual successor to his Slendrina series. It was originally released on November 24th, 2017 for Android devices. An iOS version came later that year on December 11th, 2017. The game was released via the Steam platform on November 20th, 2018. The game is available for purchase on Steam for US\$ 4.99. Since March 2018, the game has become increasingly popular in the gaming community, as YouTubers such as DanTDM, DashieGames, Denis, Kindly Keyin, John Wolfe, LightningBlueDragon, True entertainer and Vividplays Channel have played it. The game is currently on Version 1.7.3 released on April 18, 2019 for the Mobile and Version 1.2 released on March 21, 2019 ,for the PC version. Gameplay The player finds themselves waking up in a bed in a room they don't recognize. They have been locked up in an old, decrepit house by Granny, a crazy old woman (or demon) who hunts her prey with a bloody baseball bat. They must explore and find items and tools to help them open the various locks Granny keeps on her front door, all while outrunning her pursuit and hiding in the beds, coffins, and wardrobes found in the various rooms of the house. In their mission to unlock the front door, they'll also stumble upon a garage at the bottom of the house which holds a functional, albeit disassembled car. Should they so choose, they could abandon their original objective and instead focus on using the parts that they find to repair and fuel the car, which can then be used as an alternate escape method. Along the way, they'll also run into the many other secrets that Granny keeps hidden behind locked doors. Her pet spider makes an appearance as a secondary antagonist, holed up in a cage at the very top of the house. Additionally, a particularly investigative player might find remnants of a broken family, or worse, the remains of Granny's last victim. They will come across her second big pet, the Crow kept in a secret room connected to the Meat Room and the Cellar Swamp. Will the player be able to escape their prison in the five days Granny has so generously granted them, or will they succumb to her never-ending chase and face their doom in the walls of the house? Sequels Installs/Sales The Mobile version has more than 100000000 installs and the PC version has sold more than 5000 units since its release. Reviews were positive. Trivia Judging from the screenshot seen in this tweet, DVloper had been considering a PC port since before April 2018, however, the Steam release would not be put together at all until October of that year, and the game wouldn't actually launch until next month in November, very close to the game's 1st anniversary. Interestingly, Granny is the only game by DVloper, which does not include a Crowbar as an item in-game. The premise of the game was simple, and provided a new take on a familiar format. Debuting on Android, the game was swiftly ported to iOS, then PC the following year.At the start of the game, the player awakes in a darkened basement to discover that they've been captured by a strange old woman named Granny. Armed with only a flashlight, the player had to navigate their way out of the house, being careful to avoid making a sound along the way.For such an apparently old and feeble woman, Granny has excellent hearing; and she's able to move surprisingly quickly to the area where you've made the noise. To make things even more difficult, she leaves a bunch of traps lying around to ensnare unwary escapees, along with dangerous pets.To get the best out of Granny games, you'll need to be listening to it as well as watching it. The sounds you make, and the sounds Granny makes, will provide you with clues as to how to escape. If Granny should catch you, you'll be able to fend her off - but only temporarily; you'll have a few days to escape before she closes the doors on you forever.Such a simple premise has been endlessly recycled and varied to provide more of a challenge to those with nerves strong enough to cope with a scenario this terrifying - and you'll find plenty of those variants here.Presented in HTML5, the games in this section of the site are modelled after Granny and horror games like it. They're unblocked and free to play, so all you'll need is a suitable device with a compatible web browser - and, of course, nerves of steel. Don't play these games in the dark! Started playing the Granny Horror game, but can't figure out how to beat it before your time is up? Check out our complete guide of tips and strategy for escaping the house alive.The Granny horror game has taken the Apple and Android app store by storm as one of the hardest free escape room games around. While the original game was difficult enough to beat, the developer has recently updated it to add even more rooms, secret passages, and weapons, as well as a higher difficulty mode. If you're just getting started in the game and haven't managed to beat it or aren't even sure what the steps are to escape, we've put together a complete guide of tips and strategies for completing each part of the game and beating Granny. In addition, if you're looking for a walkthrough of each room in the newly updated Granny house and objects found in them (including Teddy), you can check out our Granny House tour here.RELATED: 'Granny' Update 1.7: How To Find New Room, Freeze Trap, Crow and More'Granny' Gameplay Overview: Goals and Controls Started playing the Granny Horror game, but can't figure out how to beat it before your time is up? Check out our complete guide of tips and strategy for finding every item and escaping the house alive Player:One Goal: How Do You Win The Granny Game?At the start of the Granny horror game, you find yourself lying on the floor of a room in Granny's house. The object of the game is to escape the house alive. This can be tricky because the crazy Granny that lives in the house listens to every sound. If she hears you, she'll hunt you down and attack you. You get five chances or days to escape the house before Granny finally puts an end to you. To escape the house, you have to complete a series of tasks - the main one being to deactivate the door alarm and unlock all the security items that bar it. We've listed all the objects you'll need and steps for beating the game below.Controls: How Do I Move And Interact With Objects?The controls are kind of primitive in this game and so they can sometimes be difficult to figure out. Here are a few basics you need to know.How To Move - On the left-hand side of the screen you have a white circle that is your joystick/controller. Use it to move.How To Look Around - If you want to look around the room swipe around the screen in the direction you want to look.How To Pick Up Objects Or Interact With Stuff - In the middle of your game screen, you'll notice a small white dot. If you want to open a drawer, grab an item, climb under a bed or interact with objects in some other way, you will have to move your joystick until the white dot is centered on the object of interest. If the object is something you can pick up, open or close, a hand will appear in the upper right-hand corner of the screen. Tap it to do the action. Sometimes a different icon will appear in that corner showing how you can interact with the object. Simply tap the interactive icon to complete the action or else navigate elsewhere.How To Drop Objects - anytime you have an object in your hand, you can drop it by tapping the word "Drop" at the bottom of the game screen.Crouching and Standing - you can change from crouching to standing in the game by tapping the icon of a person in the left-hand corner of the game screen'Granny' Horror Game Guide: Tips, Steps & Strategy For Beating The GameAs mentioned above, to beat the game, you'll have to unbolt the front door and deactivate the main alarm. While this task might sound simple, there are several steps you have to complete to do it. Here are the objects you'll need to find and steps for using them.Items Needed The Cutting pliers are one of seven tools or keys you'll need to find to beat the Granny Game. Player:One There are a number of main objects and keys you'll need to complete the game, five of which are keys. You can only hold one item at a time and some items will have to be used before others. I've listed them in the order I used them. Some of them may be used in any order though.Cutting Pliers - you will use these three times. First, use these the door alarm to make both lights turn green. Then use them to cut wires in the circuit box found on the basement wall. You can also use them to cut the wire on the fan in the jail cell through the hidden passage. There are sometimes objects hidden behind that fan.Padlock Key (Blue) - use this key on the padlock on the front door. It will make the top bar blocking in fall down.Hammer - used to break the wood barring the bottom of the front door. You'll have to break the wood on both ends to get it completely off the door.Cog Wheel - this is a wheel-like object you'll need to find and use on the machine in the Playhouse in Granny's yard.Winch Handle - this is a handle used with the well in Granny's yard. It allows you to raise the bucket in the well which has a key or other need object hidden in it.Alarm Code - this is a piece of yellow paper with the word "code" on it. You'll use it on the top lock of the door.Melon - this is an object you'll need to find and cut open using the guillotine in Granny's yard. There will be a key or other needed object hidden inside.Screwdriver- another object you'll need to find to unlock a secret compartment on the side of one of the sets of stairs in Granny's Basement. This compartment sometimes holds keys or other objects you need.How To Find Screwdriver - the screwdriver is an item that is always found in the same place. To locate it you need to find the high shelf in the front hall. If you stand at the top of the stairs that lead down to the front door area, look straight ahead and you'll see a very high shelf.How To Get Screwdriver - getting the screwdriver down is a bit tricky. The only way to get it is to shoot at it with the tranquilizer gun or the shotgun. We've got a walkthrough of how to find the tranquilizer gun here and how to find the shotgun, here.Safe Key (Gold) - find this to unlock the safe found in the basement.Master Key (Red) - the Master Key is the final key you'll use to unlock the main door handle and escapeWeapons Key (Wooden) - unlocks the weapons locker found in the secret passageway (guide for finding weapons room is here.) If you unlock it, you can grab a tranquilizer gun to shoot at Granny that puts her out for a while.Playhouse Key (Teal) - this key unlocks the padlock on the Playhouse in Granny's yard. Inside the playhouse is a machine that will have a key to the hidden compartment where keys or other objects are sometimes found.Car Key (Yellow/Gold) - this key unlocks the trunk of the car found in the new garage area. Other objects you need such as the hammer will sometimes be stowed there.Where To Find Tools and Keys Tools and Keys in the Granny game can be found in many places including cabinets, toilets, dresser drawers and more. Player:One None of the objects in the Granny game have a specific location and can be found in a variety of places throughout the house. Additionally, every time you restart the game, the objects in the house change locations. To find objects, you need to search any cabinet or piece of furniture with a drawer or door can potentially hold an item you need. This includes things like kitchen cabinets (upper and lower), the microwave, dressers, china cabinets, and so forth. Various household items and furniture will sometimes hold objects too. For example, toilets, sinks, chairs, and benches. The door code can be one of the trickier objects to find because it is a note that can be stickied to a door or wall as well. If you are looking for an object, move quickly through the room scanning possible object locations. Open any doors and drawers you see, but do it carefully or granny will hear. If she's coming for you, move elsewhere and return to that place later. Some additional locations where objects are sometimes found that may be trickier to discover are as follows:Jail Cell Fan - Go into the room attached to the sewing room in the hidden passage. It looks like a jail cell with a rocking chair in it. On the wall beside the rocking chair, you'll see a fan. If you have the wire cutters, you can use them to cut the power to the fan. There are sometimes objects you need hiding behind that fan.Playhouse Machine - this is found on the wall in the Playhouse in Granny's yard. If you find the Cog Wheel, you can use it with this machine to unlock a space on the machine where another object or key will be hidden.Basement Stairs Compartment - there is a metal compartment on the side of one of the sets of basement stairs. Use a screwdriver on it to open and find other keys or objects you may need.Safe - Found in the Basement. Requires the key to open.Car Trunk - the car is a new feature found in a hidden garage below Granny's basement. You'll need to find the key to the car to unlock the trunk and retrieve any hidden items. If you don't know how to get to the car garage, you can find a walkthrough for the feature, here.What If I Have To Drop Something? Will It Be Where I Left It?Sometimes you'll find an object before you need it and you have the option to either pick it up or leave it. If you drop it, it'll remain where you've left it till you die or come back. Just keep in mind, if you choose to grab the item, at some point you'll have to drop it, which will cause noises that Granny can hear. It most cases it's best to leave an object behind if you don't need it yet and just remember where it's stored.
