Www wapking com video songs a to z

the content of the `display` function is a long string of HTML code, which is a list of links to various websites. The links are organized into a grid-like structure, with each link containing a title, a description, and a URL. The links are categorized into several groups, including "New", "Trending", "Popular", and "Recommended". The links are also sorted by date, with the most recent links appearing first. The HTML code is a complex mix of tags, including `div`, `span`, `a href`, `img alt`, and `script`. The code is designed to be compatible with a variety of web browsers and devices, including desktop computers, tablets, and smartphones. The code is also designed to be easy to read and understand, with clear labels and descriptions for each link. The code is a good example of how to create a list of links that is both functional and visually appealing.
