

I'm not a robot!

BUSY BEE.

"DEARY me!" cried a busy Bee,
"What curious sights in town we see!
Children who've not tasted honey,
Big folks selling flowers for money!
Deary me!" cried the busy Bee;
"The country is the place for me."

Directions: Read and write each word three times.

bee

country

cried

curious

flowers

folks

honey

money

selling

Name: _____

Capitalization Challenge #1

Directions: Rewrite each sentence, capitalizing where needed.

1. the children played on saturday.

2. this is my brother, conor.

3. we don't have school in july.

4. her last name is nguyen.

5. my mom's name is dolores.

Name: _____ Date: _____ Class: _____

The Encounter between the "New" and "Old" Worlds**Multiple-Choice Quiz**

Directions: Select the best answer from the given options.

1. In Africa, traders gave guns in exchange for African slaves. In the Americas, these enslaved Africans were traded for molasses. These steps were part of what system?
 - a. Columbian exchange
 - b. global politics
 - c. mercantilism
 - d. triangular trade
2. Which of the following was not native to the "Old World"?
 - a. cattle
 - b. corn
 - c. horses
 - d. smallpox
3. The massive global transfer of living things (plants, animals, people) which began in 1492 is referred to as the _____.
 a. Columbian exchange
 b. encomienda system
 c. encounter
 d. Treaty of Tordesillas
4. The Trans-Atlantic slave trade had a _____ economic effect on many African communities.
 - a. negative
 - b. positive
5. Which of the following was not native to the "New World"?
 - a. pig
 - b. potato
 - c. tobacco
 - d. turkey
6. Under what economic system do colonies ship new materials to the "mother country," and buy finished products from the "mother country" in exchange?
 - a. barter
 - b. capitalism
 - c. command economy
 - d. mercantilism
7. The Portuguese used _____ to gain control of trade in southeastern Asia.
 - a. bribery
 - b. diplomacy
 - c. kryptonite
 - d. military force
8. What invention, combined with advancements in cartography, aided Europeans in their exploration of the Western Hemisphere?
 - a. anchor
 - b. astrolabe
 - c. plank
 - d. steam engine

Math games teach consistent skills with the school curriculum along with the skills that formal education sometimes gets lost - the skills of enjoying mathematics while thinking hard. Mathematic Theme Review The Below shows the common standards of basic mathematics along with grades. Domains Grade Level Counting " Cardinality K only Operations " Algebraic Thought K - 5 Numbers " Operations at Ten K Base - 5 Number " Operations - Fruits 3 - 5 Measurement " When children enter the infant garden, they have a very limited experience with numbers. Some can count up to 10 and some can count up to 100. Kindergarten children are taught for the first time about one-to-one correspondence where they connect a number with an object and then they have understanding. They then make their way to understand cardinality, that is, to say, to tell you how many there are in a set. At the end of kindergarten, children know the sequence (up to 100) and the numbers names (up to 20). They are able to count the number of objects in small sets (up to 20) and also learn to compare them. Operations & Algebraic Thinking Kindergarten: After understanding the cardinality, the concept of addition is introduced and subtracted. Children understand that the addition is to put together and add and understand the subtraction as to disassemble and take from. This concept is taught using objects, drawings, manipulators as counters or through math games. At the end of kindergarten, children can add or subtract within 10. Grade 1: At this stage, children are taught to represent and solve problems of addition and subtraction of words within 20. They understand the relationship between the addition and the subtraction. They also work with the addition equation and subtract to find the entire number lost in the equation. Grade 2: At this level of grade, children can add and subtract fluidly into 20 using mental math strategies. They also develop skills to add and subtract within 100 and :3 :3 odarG .sacit; Ämetam ed n³ÄicacilpitluM al arap sesab ranag a naduya sel euq sotejbo ed selaugi sopurg noc najabart n©Äibmat so±Äin sol .sarbalap ed samelborp sosap sod y onu Elohw of Taht Ezingocerä ä edarg siht 2 edarg .09-01 egnar eht by 01 Fo Selpitum yb Srebunmunmnun elohw of the 011 and 01-ht dnuor dna 0001 ihtiwiÄ Ätcartbus dnaÄ Ädda ot gnidnatsrednu eulav ecalp fo esu ekamÄ Äsdik ,edarg siht nI :3 edarG .srebmun tigid owt ruof ot puÄ Ädda ot slliks poleved yeht ,osla .0001 nihtiwiÄ Ä tcarthbus roä ä ,dda yltneulf ot gnidnatsrednu Eucalp Eriht Esu Yeht .meht erapmoc dna net net sab seman rebumn dna ednapxe ht eth tna tnapt t-e t-egmun derdnih decudortni Era ,Level edarg siht ta ,sdik eht :2 edarg .09-01 Eggnar eht 01 ot Celphitum ehtâ Elba era dna metsys Eulav Ecalp dnatsrednu yeht .021 naht ssel rebun yna morf gntrats ,021 ot truoc ot nraelä ä ,sdik ,edarg siht nI :1 edarG .91 ot 11 morf seno dna snet otni srebmun esopmoc ot woh nraelÄ Äsdik ehT netragredniK neT esaB ni snoitarepO & srebmunN .snrettap eht fo smret gnidnopserroc neewteb pihsnoitaler dna snrettap htam ezyiana ot slliks poleved osla yehT .snoitarepo fo redro eht gnisu snoisserpxe laciremun rebumn elohw etauleve ot nraelÄ Äsdik ,level siht tA :5 edarG .srebmun etisopmoc dna emirp ,selpitum dna srotcaf htiw ytirailimaf iag osla yehT .snoitarepo ruof eht gnisu srebmun elohw gnivlovn smelborp drow htam pets- itlum evlos ot detcepixe eraÄ Äsdik ,edarg siht nI :4 edarG .snoitarepo citemhtira ni snrettap nialpxe dna snoitarepo ruof eht gnivlovn smelborp evlos ot elba eraÄ Äsdik eht ,3 edarg fo dne eht yB .noisivid dnaÄ ÄnoitacilpitluM neewteb ihsnoitaler dnaâ ä ä ä ä SHACNOITOTUMPILM FO SEIPREPORG EHT nrael Yeht .001 nihtiwiÄ ä ,noivid dnaâ A day in one place represents 10 times the day to your left. They are able to read and write number of several days, their expanded form and names of numbers. They use their comprehension of the place value system and the properties of operations to perform arithmetic of various days. In addition, they develop a ability to perform the multiplication of up to four days for a day and multiply two days by two days. In addition to this, division with quotients and remainders to dividends of four days and divisors of a day is taught. Grade 5: This degree requires the introduction of decimal numbers. The children are taught to read, write and compare decimals to millions. They were also taught to carry out operations with whole number of several days and with decimals to hundreds. Number & quot; OPERATIONS - Fractions Grade 3: Fractions are introduced at the level of this degree. The children develop an understanding of fractions as number. They learn the representation of fraction in the number number. They learn about the concept of equivalent fractions and comparing fractions with the same numerator or denominator. Grade 4: In this degree, children extend their understanding of the equivalence and order of fractions. They are able to compare fractions with different numerators and different denominators. They also learn decomposition of fractions together with adding, subtraction and multiplication of fractions and mixed number. Grade 5: The children, in this degree, are taught the addition and subtraction of fractions when making equivalent fractions. The children are expected to extend their previous understanding of the multiplication and division to multiply the fractions with entire fractions or number. They also interpret multiplication as escalation and are able to solve problems of the real that involves multiplication of fractions and mixed numbers. apply an earlier le ne solugn; Ätcer arap ortemÄrep y aer; Ä racilpa a nednerpa n©ÄibmaT .sodiukÄl senemºÄlov y orenid ,sotejbo ed sasam ,saicnatsid ,opmeit ed solavretni nacilpmi euq sarbalap ed samelborp revloser arap senoicarepo ortauc sal nazilitU .sedadinu ed ametsis nu ed ortned n³Äicidem ed sedadinu ed so±Äamat nanoicaler ,levin etse ne so±Äin sol :4 odarG .sonogÄlop ed sortemÄrep nacilpmi euq laer odnum led samelborp nevleuser n©Äibmat so±Äin sol .n³Äicida al y n³ÄicacilpitluM al noc aer; Ä le nanoicaler y aer; Ä ed otpecnoc le nednerpmoC .dutignol odneidim n³Äicidem ed sotad nareneg ,sadalacse sarrab ed ocif; Ärg nu y adalacse negami ed ocif; Ärg nu rajubid a nednerpa ©Äibmat so±Äin sol .sortil y somargolik ,somarg omoc sasam y dadicapac ed radn; Ätse dadinu al necudortni eS .esab atse erbos sarbalap ed samelborp navleuser n©Äibmat y sotunim ne opmeit ed solavretni nedim y onacrec s;Äm otunim la opmeit nabircse y netneuc ,odarg etse ne ,so±Äin sol euq arepse eS :3 odarG .sarrab ed ocif; Ärg y ocif; Ärg äenÄl ed amart noc necudortni eS .orenid le y opmeit le noc najabart y dutignol al a atser al y n³Äicida al nanoicaler eS .radn; Ätse sedadinu sal ne sotejbo sol ed dutignol al neºÄlave y nedim euq arepse eS .sortem y sortemÄtne ,seip ,sadaglup omoc n³Äicidem ed radn; Ätse sedadinu sal ecudortni odarg etsE :2 odarG .s;Äm o sonem sotn; Äuc o a-rogetac adac ne sotn; Äuc ,selatot sotn; Äuc omoc satnugerp noc sotad neterpretni e netneserper ,necinagro euq arepse es n©ÄibmaT .selatigid y socig³Älana sejoler odnazilitu saroh saidem y saroh ne opmeit ribircse y ratnec ed secapac noS .setnareti dutignol ed sedadinu etnaidem y etnematceridni dutignol al ridem a nednerpa ,odarg etse ne so±Äin sol :1 odarG .senumoc selbarusnem sotubirta noc sotejbo sod rarapmoc a nednerpa so±Äin sol .dutignol al y osep le omoc selbarusnem sotubirta ed azna±Äesne al ne artnec es odarg ed levin etsE :sotad ed netragredniK ;touq& n³ÄicideM .sairatinu senoiccarf y soretnre sotn; Äridivid arap n³Äisivid ed etse etse nE :5 odarG .rotcartorp nu dnazilitu oretne oremºÄn ed sodarg ne solugn; Ä nedim y solugn; Ä ed sotpecnoc nedneitne ,acirt©Ämoeg n³Äicidem ojaB .laer Children are taught to convert different size measurement units into a given measurement system and use these units to solve word problems. Under geometric measurement, they are taught about the concept of volumes. Geometry Kindergarten: Children, to this degree, describe objects that use form names and also identify and analyze the form as two-dimensional or three-dimensional. Grade 1: Children, at this level, distinguish between the definition of attributes and undefined attributes of forms. They are taught to divide circles and rectangles into two and four equal shares. They identify triangles, quadrilaterals, pentagons, hexagons and cubes. Grade 3: Children recognize squares, rombos and rectangles as quadrilateral. They are able to differentiate between quadrilaterals and forms that are not quadrilateral. They can also partition forms in equal parts. Grade 4: Children are expected to draw and identify lines and angles, and classify the forms of their properties. They are also taught to identify symmetrical line figures and draw symmetry lines. Grade 5: Children are taught to the graphic points on the coordinate plane to solve problems of the real world. They classify two-dimensional figures in a property-based hierarchy. Splashlearn Splashlearn's math games are one of the pioneers in the educational system that provides a well-designed learning material according to common basic math standards and most state standards. Some of Splashlearn's attractive features are: play on any device: children can play Splashlearn games on their choice device; iPad, computeriPod, etc. Interesting and rewarding games: kids jump with excitement when they realize they can buy their favorite animated pet from won coins practice. Parent Connect App: The parents can get instant notifications on progress improvement and skill completion through their app. Offline access: SplashLearn gamesÄ can also be played offline through their app. These are only a few features that make SplashLearn attractive, there are many other reasons to choose SplashLearn for making math learning fun. fun.

Spelling, punctuation and grammar provides the foundations and framework for written communication, and is an essential part of education and later in life.
