If you are interested in another big name of the same creator, Boom Beach and Kings' collision are also two great games. If you are not familiar with clan collision, this is a game where you are making fortresses with golden resources and elixism. However, the buildings are drawn and renovated because players and resources are regularly collected and saved during registration during registration. Over time, players build an army from different types of troops. They can be accepted on a mission with a player to destroy the goblinDörfer nearby or based on the village groups nearby.Other players can attack your city. Don't worry, nothing is permanently damaged, although opponents may steal some of their gold and potion. Players earn and lose Multiplayer raid trophies to determine rank and clan affiliation to get even more loot in massive group battles. It sounds like it, but there's a lot more to it, and we're here to help! Be patient, hold on to your jewelry. The biggest reservation for any free game is the premium currency system. Almost everything is at some point, and the further it progresses, the longer these timers become. Grab and spend any valuable jewels as in urgent production. Keep them for something important that you can keep. Take the full and clear achievements of natural barriers to create the number of gems. First, jewelry must be an outlet for construction cottages. Furthermore, there is a lot of scope for discretion in spending on gems. Buying resources with gems is usually a poor use of resources. It is better to enlarge your own production building. If you have enough jewels, think about it for a long time and it is difficult what is important to you in the game, because if you want to go through it ten times, then take some time. On the other hand, it is difficult for you to go through the game's competitive content without spending money. If the timers go down, play a few more games and continue. Candy Crush Saga and Simpson Saga are solid options. The highest player competed against each other and developed their own similar game, Samurai Vicies (open in new tab) and Gameloft has a copycat Roman theme called Total Conquest (open in new tab). There is also a Clash Royale Supercell (opens in a new tab) that gives card rotation at the beginning of the clan universe. Update your players. you are luckySwitch between two views. If the main interest is defense, the first upgrade should be your town hall, followed by defensive buildings - first mortars, then an archery tower, then cannons. Ming and Ain Defense are the most important towers, so make sure they are close to the center and have more defenses. Then start working on buildings for the production of various sources and make sure they are fully upgraded. Some players intentionally unleash a few potions and wall mines so other players can control them without destroying everything they have, although it's often handy to exit lower-priority buildings like others as Ciants to make sure it's done what matters is that things are better. -B, can overlap on fire fields instead of covering a larger area. Also, keep in mind that players with higher-level councils will earn less by raiding lower-level players - if you're playing, don't rush to upgrade the town hall. Just because you're playing defensively doesn't mean you should neglect your barracks - in fact, you can hire soldiers to train and then later fill in for those who are in the queue and temporarily turn the barracks into a t-shirt. Non-Nether storage of the potion. If you are aggressive, the order is similar. Build your town hall first, then get to work and start potion production so you can start accumulating shares right away. Then ask for barracks and camps to start building an army. None of these buildings provide raid sources, so you can place them in front of walls. Then add walls to your defenses and it works. The only thing left is a unit upgrade lab, a spell factory for extra offensive power, and a gold mine to upgrade structures. Since the game is based on loot count, some players intentionally keep their minimum to get away with lower level players. So be carefulFights that you choose early. If you want to cultivate a player from a lower level to yours, you lose trophies independently by attacking a unit. Schilde up! The attack can be negative, but luckily they have a 12-hour sign if 30 % of their city are destroyed or the town hall collapsed. If 90 % of their base are swept, they have more than four hours. How do you do the best of this game? Well, don't start immediately and attack, that's sure. This will keep your sign immediately. Safety time is precious, so use it to your advantage: take your time to understand how you can improve your economy, build your army and upgrade your protected towers (because you do not fire if you upgrade). ) Or simply acquire and output resources until the pain tract returns. Schildes are so useful that you even want to report voluntarily to move your town hall outside. They lose a trophy and some resources, but it is often worth it. If you want a struggle, remember that clank team does not affect the shield timers at all. Make sure that you look at the shield timer. After expiry you will be attacked for a certain time, but others cannot attack. The duration of this village guard depends on the league in which you are. It is a great place that you can visit on every opportunity. After all, they cannot be connected while they are online and play. If you can play on your iPhone or iPad all day, this is an easy way to protect yourself. Discover countries Discover the most important strategic combat mechanics in Clash of Clans is to have as many walls as possible between your resources and the outside world. To do this, make sure that you have no empty fields around the scope and make sure that you have no suitable cards in your base. We recommend that you make sure that the structures are closely connected so that the cannons and other defense structures can cover as much as possibleTo slow down the enemy's attack, the buildings must be placed in small fragments of improved walls. The laying of many layers of the walls makes them more susceptible to spray from the wall switches, so make sure that the cells are filled with buildings. You must also put your most powerful protection closer to the center of the base; Create the largest buffer zone with other buildings and walls so that the attacking soldiers should chew other things longer to get weapons. This increases the availability of your defense and increases your chances of repeating the attack. Choose your goals - these are several things that you should keep in mind when you take out your opponents before starting to quit troops. First, look at the level of the town hall - if it is much lower than yours, you will receive less prey. You see exactly how many resources you can lose. At least you want to resere funds spent on the army. If you are looking for only resources, defend a handful of goblins and a loss of struggle is often more profitable than winning an attack that requires resources. Before creating your first army, you should know what raw materials you are looking for. If you want to get a trophy for promotion in the ranking, you need to invest a lot of soldiers to get two or three stars. You must also use the supply of Elixir when you want to supplement (or restore) resources for soldiers. As soon as you do this, all you need to do is present the most effective safety of these resources. First use giants to remove fire from the towers, then break through, and then giants to sweep protection. Barbarian, magicians and archers can bite through buildings after cleaning the zones of the department and mortars, while Kobolds can collect resources. But be careful how many soldiers you let in. You wantTo be able to achieve victory by fleeing as little as possible. Remember that you have no direct control over your troops. Find out what your device's preferred lenses are and set them accordingly. Barbarians will run headlong into the adjacent building, which isn't good news when there's a heavily defended Mortar a little further away. Send wallbreakers and giants to open up new ways to attack. Smart players create bases that move troops directly to areas with lots of traps that can weaken your attack very quickly. Raid BuddySonce Activate your town hall, complete single player levels and reset yours. Castle, you're probably pretty hard on the game and ready to start organized clan play. These cool ways to communicate in the game are not only very good, you can also use coordinated attacks to help you get some really good loot. Keep in mind that although you can use block clans for attack and defense, although you can summon it for attack and defense, although you can summon it for attack and defense, you can use the loot you can summon for both attack and defense, although you can summon clans for attack and defense, even if you can call each other for attack and defense, even if you can use the prey you can call for both attack and defense, but you can contribute to the fact that you can call both attack and defense, although you can call it. Troops should also be deployed - after all, this is teamwork. Regularly post what you're up to, invite top contributors to try and figure out what to do next, and have fun! Your clan may want a competitive championship, which can get quite intense. Cast your weight in the Warsangtack Clan first, as you and your Clan are the best at attacking them. When picking targets in Clan Wars for the first time, let the matchmaking system find you a good opponent. While you can take on stronger opponents, your lower level allies may struggle to keep up with the same wave of difficulty. If you choose the easy way, you strip good opponents from lower level allies, forcing them into battles they can't win. Beat your weight and the whole clan will win. Use the Scout function to reach your goalInstallation at the camp to become part of the Earth and create your own army in order to defeat it. If the walls are low, go down. If air defense is not updated, get a balloon. Provide specific requests for the soldiers you wish to send to your clan. After finding the strengths and weaknesses of those you attack, you can create the best army. Your best clash of clans tips, tricks and cheats! Clash of Clans has incredible depth for everyday play.
