Make sure you follow this NO-CD guide Instruction part 1: DownloadContinue reading Posted 14 May 2006 - 12:59 PM thanks to the help of quite a number of modders on here i was able to finally complete my mod after almost 2 months of slogging and parenting neglect:p ~i have a son for some of u that dont know and yes im deifnately older than the majority here:P~anyhow, as it states in the readme below, this mod is a fun mod. it opens up the game to allow pretty much whatever you want to build. while the computer ai doesnt take advantage of the new stuff, like most mods if not all as i was told yesterday, is for multiplayer. this is the only release of its kind. the reason for this is simple. i love the game but there were a few things i wanted to remedy to make it better. in doing so i added or discovered other things i could add or change thus coming to the mod now ready for anyone wishing to play it. ive extensively played it to make sure everything works but you may find things i might have missed. id love feedback not that i'll really be going in and re-releasing newer versions but just on what ppl think in general. i dont expect ppl to love it since this was a project for me and a mate i play lan games with only. but hey if u do great, if not, thats fine. finally as stated also in the readme there are 3 secrets. these secrets are units which have a special ability to make your armies even deadlier. im curious to know if ppl are finding the correct secrets im thinking of. click here to download the mod or click here to view screenshots of the game and further install guides for the mod. again thanks for all your help you guys, if ive left anyone out i'll put u into the readme and on the site. cheers.Zen JirikiThe Lord of the Rings: Battle for Middle-Earth 2The WarFor patch version 1.03www.bfme2thewar.cjb.netZen Jiriki (Creator of The War mod)-----Firstly I would like to thank the knowledge, experience and help various members of the 3rd Age community have offered me in my first-time mod for this outstanding game. Without you guys this mod wouldn't exist. Helping newbies like myself must be a challenging and frustrating part for anyone who has the experience to offer. To that I thank you for your patience and understanding. This is the first I've ever modded for a game, but BFME2 while great had a few holes that I thought that needed filling.This game does not add new units, models, structures or spells. This means that some moves, units or structures which were hidden or not available in the code now are. Want to build Balrog's for your army? you can. Call in the eagles from lone battle towers to protect an oncoming siege. its all there.This mod is meant to be fun.it allows the player to custom build their entire army whether they want some elves and the rest dwarves, all goblins except for some isengard, you can do it. there will be no updates or future revisions. this mod is a once off and i made it this way. feel free to do whatever you want to it. if you can think of improvements and you do them let me know. im always up for tinkering with it in case there is something i have missed. below you will read the list of members which have helped me over the last few weeks since i began, and then you will read what the game mod has to offer.\*\*This mod utilizes some new coding features which haven't been seen before, and some previous mods done by other modders as well. The names below encompass those who have helped me and any mod which was created by someone else. I don't take other peoples hard work and make it my own and i resent anyone that does, so please always do the right thing and give credit where credit is due.-----Solinx (New menu system, take a hint EA, this one is better)Tom8778Azrael (thanks for getting Shelob's awesome Webbing ability available to her arsenal)The DoctorJ-a-Yzimoo2playgamesMicksLord of Gifts (Blackrider multi-mount mod)ChedKelsoGumby22donKing of UniverseFingulfinHostileLadyRhieaArgolisanyone that i missed out i apologise. thanks again for your help and i am very grateful for your time and patience when i know you're busy with your own projects.- INSTALLATION - 1) Unrar or unzip the folder "mymod" to your main Battle For Middle-Earth 2 directory.2) In this directory, right-click on the lotrbfme2.exe and create a new shortcut.3) Right click on the shortcut you just created and select Properties. Where it says Target there will be the path where the executable for the game is located, which obviously is in your BFME2 directory."E:\Games\The Battle for Middle-earth TM\lNotrbfme2.exe"
